  Completed 2004

Some of my certifications

- Lean Six Sigma Black Belt
- Certified Agile Leader (CAL-1)
- Power BI Data Analyst (Microsoft)
- Google Data Analytics
- Generative AI Leader (Google Cloud)
- IBM AI Foundations for Everyone
- ITIL 4 Foundation
- Certified in Cybersecurity (ISC)²

What teams get

Hands-on practice. People work on their own laptops, with your own files and examples.

Simple language. No jargon. Everything is explained in plain words, with relatable examples.

Study material. Notes and exercises after the session, and questions are welcome afterwards.

Flexible delivery. On-site anywhere in India, or online, in half-day to multi-week formats.

YAHYA BANDUKWALA
PROGRAMS AND FORMATS

Training programs

Each program can be shortened or changed to suit your team.

Generative AI and Prompting for Work

Your team learns to use tools like ChatGPT, Gemini and Claude to draft, summarise and analyse faster, and to use them safely.

- How AI tools work, in simple words
- Writing good prompts for emails, reports and analysis
- Hands-on practice with ChatGPT and Gemini
- Using AI safely with company information

For: All office staff and managers
Length: Half day or full day

Power BI and Data Analytics

Your team turns Excel sheets and company data into clear dashboards that managers use every day.

- Connecting and cleaning data (Power Query)
- Data models and DAX formulas
- KPI dashboards and reports
- Sharing safely with row-level security

For: Analysts, finance, operations and MIS teams
Length: 2 to 3 days, or 4 weeks

Advanced Excel and Reporting

Your team builds faster, cleaner and error-free reports in Excel.

- XLOOKUP, INDEX/MATCH and IF/IFS
- Pivot tables and slicers
- Data checks and error-proof sheets
- Automated monthly reports

For: Finance, sales, operations and admin teams
Length: 1 to 2 days

Agile and Scrum for Teams

Your team plans and delivers work in short steps, with clear priorities and fewer delays.

- Sprints, stand-ups and reviews
- Writing clear tasks and priorities
- Using Jira, Trello or similar boards
- Working across departments

For: Project teams, IT teams and team leaders
Length: 1 to 2 days

Microsoft Power Platform for Office Teams

Your team replaces email chains and manual Excel work with forms, approvals and simple apps in Microsoft 365.

- Microsoft Forms and SharePoint lists
- Approvals and reminders with Power Automate
- Simple apps with Power Apps
- Automations in Microsoft Teams

For: Operations, HR, admin and IT teams
Length: 2 days, or 4 weeks

Communication and Coaching Skills for Managers

Managers give clearer instructions, hold better meetings and coach their teams with confidence.

- Business emails and meeting habits
- Giving feedback and handling difficult talks
- Coaching conversations with the team
- Presenting work to leadership and clients

For: Team leaders and managers
Length: Half day or full day

Process Improvement and Lean Basics

Your team learns to see waste in daily work and fix it with simple, proven methods.

- Mapping a process end to end
- Finding delays and waste
- Simple root cause methods
- Small improvements that last

For: Plant, quality, operations and service teams
Length: 1 day

Building with AI Coding Tools

Your team learns to plan, build and check software with AI coding tools such as Claude Code, ChatGPT Codex and Gemini Antigravity, with good quality and in a safe way.

- Which tool to use when, and how they work
- Planning the work and giving clear instructions
- Checking AI-written code: review, testing and security
- Building a small working tool from start to finish

For: Developers, IT teams, analysts and managers who want quick prototypes
Length: 2 to 4 weeks

How the training is offered

Half-day workshop
About 3 to 4 hours. A good way to start with one topic.

Full-day workshop
A full day of hands-on practice with your own examples.

2 to 3 day program
A deeper program for one team, with exercises each day.

Multi-week program
For example 4 weeks with 2 sessions a week, so the team can practise between sessions.

Institute and college sessions
Guest sessions or visiting faculty for training institutes and academies.

Where: On-site anywhere in India, or online.
Price is on request, and can be agreed per session or for the full module.

What participants say

Public reviews from working professionals who attended my live sessions on Topmate.

"Our session with Yahya was very insightful. I truly felt that his suggestions came from a partner's perspective, with a genuine understanding of our business and its needs."

Saumya
Workshop participant, January 2026

"Today's workshop was a great deep dive into AI. The content was highly engaging and gave me several actionable takeaways that I can start implementing immediately."

Dhanashri Amolik
Workshop participant, February 2026

"It helped me getting new perspective in using AI tools effectively and wisely. Yahya has good command on multiple tools and his thought process is very clear."

Amit Khardenavis
Workshop participant, January 2026

"I learned about different tools and when and how to use them, which was really helpful."

Utkarsha Raut
Workshop participant, February 2026

"A highly valuable and practical session. It provided a solid foundation of AI principles and immediately useful tips for work. Well worth the time!"

Punjaji Karjatkar
Workshop participant, January 2026

"It helped me to understand what the A I is and its tools. It was a very interactive and knowledgeable session with expert coach."

Namdev Sule
Workshop participant, January 2026
